

Classification of categories

To give a clear presentation of the products in the FiBL input list they are classified into categories. Please assign your product to a category by finding the corresponding number (left column) and designation (right column) and writing the information in the field "Preferred FiBL category in the Input List" on the form "Application for registration of composts, potting soil products, mulching materials, substrates, soils, biodegradable pots or technical materials" (e.g.: "1-20 Composts and digestates"). Several categories can be specified. Please also refer to our scale of fees.

FiBL reserves the right to change the category previous to the publication.
